WHAT'S HAPPENING IN THE MARKET

MARKET NEWS

Trends that shape asset valuation and deal structure.

01

Tighter resource-reporting requirements

Investors and banks increasingly demand CP/QP-grade reports under JORC and NI 43-101. Declarations without a competent person carry less weight in deals.

Industry trend

02

Demand for independent valuation in M&A

In mining and industry, demand grows for an independent valuation — as a financing condition and protection against overpaying.

Deal practice

03

Intangible assets move into focus

Brands, patents and software make up a growing share of deal value. IP valuation under IVS 210 and ISO 10668 becomes a distinct due-diligence subject.

Valuation trend

ANONYMISED PRACTICE

OUR CASES

Types of mandate and outcomes. Figures and parties are generalised; details under NDA.

GOLD MINING

Ore asset DD

Technical and legal due diligence of a licence area, reserve reconciliation against state expertise, resource-model checks.

OUTCOME

A reasoned fair-value range; recommended structure with an earnout.

OIL & GAS

Asset-package valuation

Independent valuation of a field-and-processing package, source analysis, red-flag detection.

OUTCOME

A buyer-specific price range; a deal risk map.

INTELLECTUAL PROPERTY

IP valuation to international standards

Independent valuation of an IP portfolio — patents, brand, software, know-how — using relief-from-royalty, MPEEM and cost methods.

IVS 210

ISO 10668

Relief-from-royalty · MPEEM

OUTCOME

A reasoned value of intangibles for a deal, equity contribution or licensing.

DIGITAL ASSETS

Platform pre-money valuation

Valuation of a technology platform via DCF and multiples, model and growth-assumption checks.

OUTCOME

A pre-money range and a green zone for the funding round.

INDUSTRY

Startup valuation

Pre-money valuation of an industrial solution, triangulated methods, niche and entry-barrier analysis.

OUTCOME

A reasoned value range and investor entry terms.

AGRI · INVESTMENT PROGRAMME

Feasibility review

Techno-economic review of an investment programme, CapEx, OpEx and schedule checks.

OUTCOME

An opinion and investor-ready materials.

HOW THE WORK IS BUILT

WHAT THE ENGAGEMENT COVERS

Transparent stages and fixed deliverables — from screening to the report and support.

1

Rapid screen

A quick read of the asset and key risks, a go / no-go decision.

3

Source reconciliation

Matching the seller's data against state expertise and independent data.

5

Risk map

A list of red flags and scenarios of their impact on value.

2

Due diligence

Desktop and field verification, collection and analysis of primary sources.

4

Valuation & modelling

DCF and multiples; for IP — relief-from-royalty and MPEEM under IVS / ISO 10668.

6

Report & support

A CP/QP-grade opinion, a value range, negotiation support.

WE WORK TO STANDARDS

• JORC

• NI 43-101

• SAMREC

• NAEN / ΓΚ3

• VALMIN

• CIMVAL

• IVS 210

• ISO 10668
